## **BC School Fruit and Vegetable Nutritional Program**

September 30, 2020

Dear Parents and Guardians,

Once again this year, Cook Elementary School will be participating in the BC School Fruit and Vegetable Nutritional Program. Once a month, fresh fruits and vegetables will be delivered to the school. Following our Health and Safety Protocols, the fruits and vegetables will be washed and individually wrapped for distribution to students. There is **no cost** to this program. These snacks do not replace regular recess or lunch food; they are supposed to supplement what the students are already eating. This is a collaborative program of ActNow BC, administered through the BC Agriculture in the Classroom Foundation.

If your child has any allergies to milk, fruits or vegetables, please contact the office and we will share this information with the classroom teacher.

Thank you.

Sincerely,

Sarah Loat  
Principal
